

Ref. No.: UE /02742/17

Date: 23 Feb,2017

Attention: General Manager

Dear Sir / Madam

Greetings,

Golden Star Consulting (GSC) is pleased to invite you to participate in its upcoming workshop:

Enterprise Resource Planning (ERP) Implementation

That will take place in Amman – Jordan during the period from 02/04/2017 through 06/04/2017, Total credited hours (25 hrs.) over 5 working days.

Highly qualified Instructor enjoys wide experience in ERP implementation projects in Jordan and he region.

Course Overview

ERP (Enterprise Resource Planning) Systems are one of the most important Information Systems in any organization; they have become the backbone of any today's businesses and increasingly becoming an essential and mandatory component towards building a successful business.

Implementing an ERP is not about installing a piece of software, to the implementing vendor, it's a project, while to the receiving company it is a part of the organizational transformation and development, and companies invest huge amounts of resources in such projects, therefore proper readiness and involvement of the core team is critical to the success of these projects.

In most implementations, there is a gap between the consulting vendor who is implementing the solution and the organization who is using it, and this training is to fill this gap, and help companies understand their role more and get much more benefit from their new system.

Course Objectives

- Understand the organizations, structures, and business cycles.
- Understand the importance of Information Systems and ERP for an organization.
- Understand the implementation project and project management.
- Explain and understand the basic requirements, and how to be ready.
- Discuss the implications of ERP on business processes reengineering.
- The key technical and business pieces of ERP: Master Data, Forms & Reports, Security, roles & Responsibilities, etc.
- Understand what training on ERP should mean, and what accepting the ERP means.
- Understand the benefits of Continual Improvement to the organization through the interactive support and feedback.
- Discuss and understand the major challenges and risks in an ERP implementation.
